

Positioning: Boundary Condition for AI Systems

**LUMINA-30**

# **NOT Alignment**

Not behavior shaping

Not preference  
optimization

Not value learning

**NOT  
Control**

Not control  
architecture

Not internal  
constraint system

Not autonomous  
safety mechanism

# **NOT Policy**

**Not regulatory  
framework**

**Not institutional  
policy**

**Not governance  
mandate**

# IS Boundary

**Condition under which  
effective intervention  
remains possible prior to  
irreversible impact**

**Structural evaluation  
requirement**

**Civilizational  
boundary**

LUMINA-30 defines  
the *minimal condition*  
under which *irreversible*  
*system actions* must  
not proceed without  
*effective human*  
*intervention.*
